Mitrocops Installation Service

If you need help installing and configuring your module, we can offer you an installation service, which can be purchased on our modules online shop:

<http://www.mitrocops.com/professional-installation.html>

Installation:

1. Enable Force compile.

Prestashop 1.6.x.x

Log into Prestashop Admin Panel and go to Back Office > Advanced Parameters > Performance and set Template compilation: Force compilation.

Prestashop 1.5.x.x

Log into Prestashop Admin Panel and go to Back Office > Advanced Parameters > Performance and set Template Cache: Force compile and set Cache: Disable

Prestashop 1.4.x.x

Log into Prestashop Admin Panel and go to Back Office > Preferences > Performance and enable the Force compile. (Force compile - this forces Smarty to (re)compile templates on every invocation. This is handy for development and debugging. It should never be used in a production environment.)

Prestashop 1.3.x.x

To clear cache /tools/smarty/cache/ and /tools/smarty/compile/ delete files in these folders.

2. Upload files

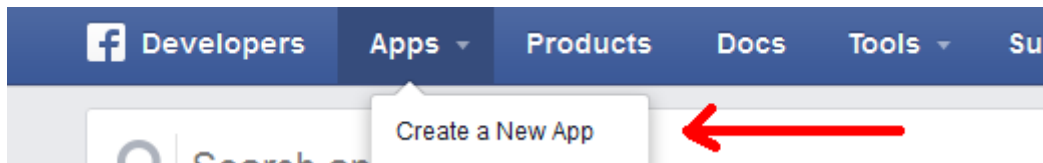

Upload all files and folders from folder /modules/ using an FTP client.

3. Install module.

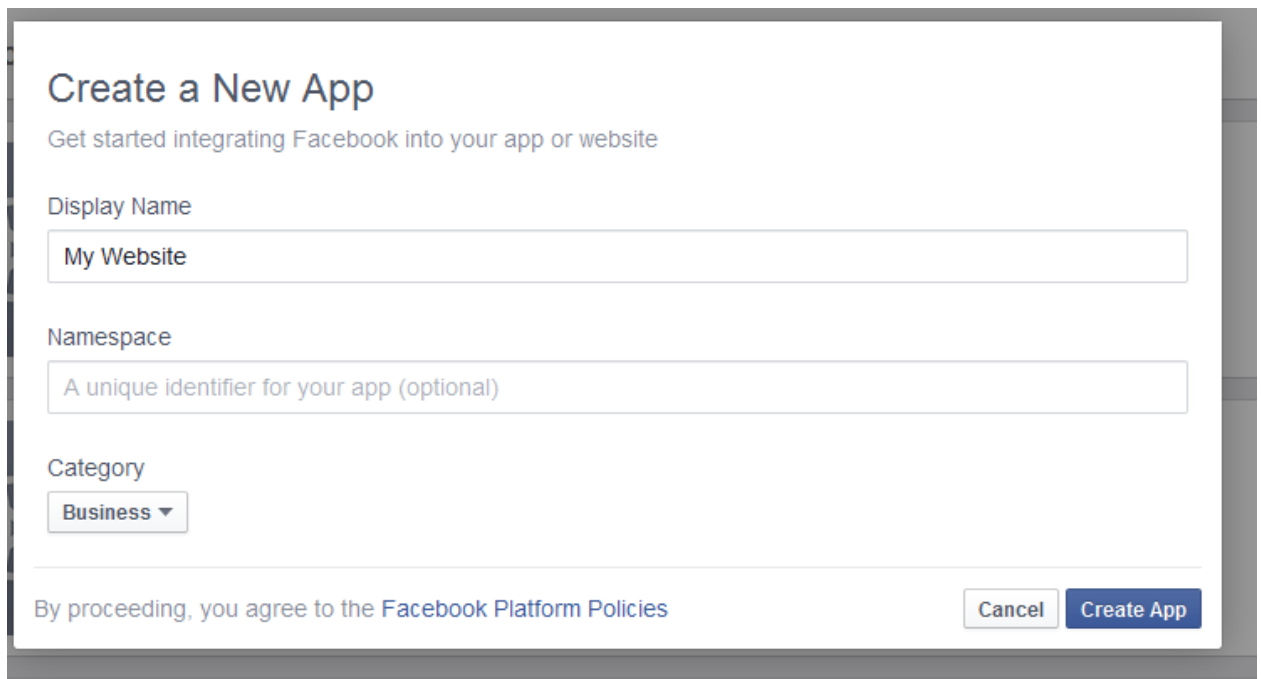

Log into Prestashop Admin Panel and go to Back Office > Modules > Other Modules and install **Facebook Connect, Fan Coupon, Coupon for registration** module.

4. Facebook settings:

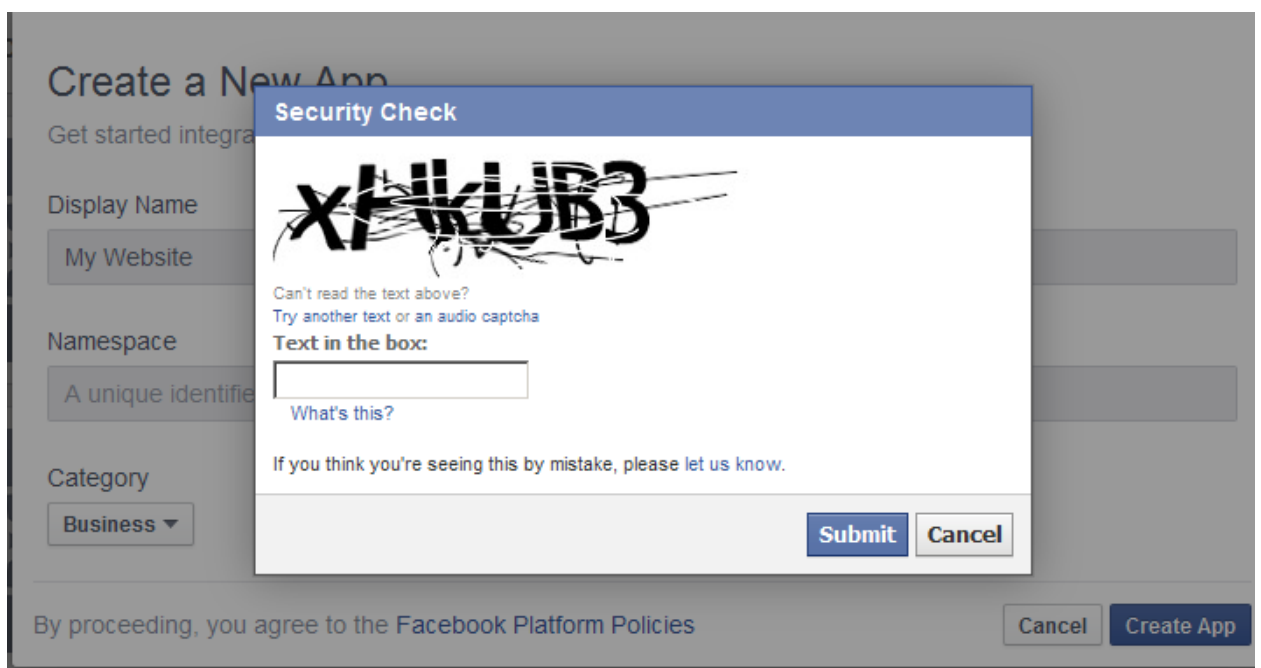

- 1) Go to the <https://developers.facebook.com/apps/?action=create> and press **Create a New App**

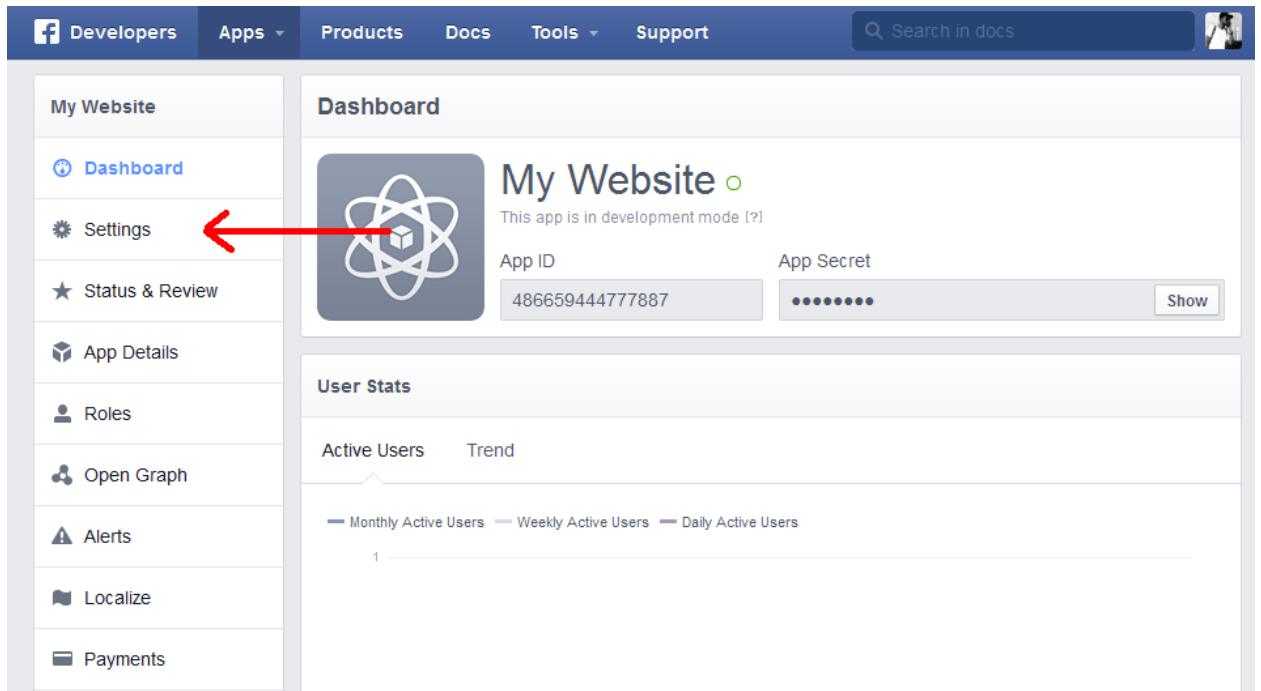

- 2) Create a New App. Enter **Display Name** and choose your **Category**

A screenshot of the 'Create a New App' form on the Facebook Developers website. The form has a title 'Create a New App' and a subtitle 'Get started integrating Facebook into your app or website'. It contains three input fields: 'Display Name' with the value 'My Website', 'Namespace' with the placeholder 'A unique identifier for your app (optional)', and 'Category' with a dropdown menu showing 'Business'. At the bottom, there is a checkbox area with the text 'By proceeding, you agree to the Facebook Platform Policies' and two buttons: 'Cancel' and 'Create App'.

- 3) Enter Security Check

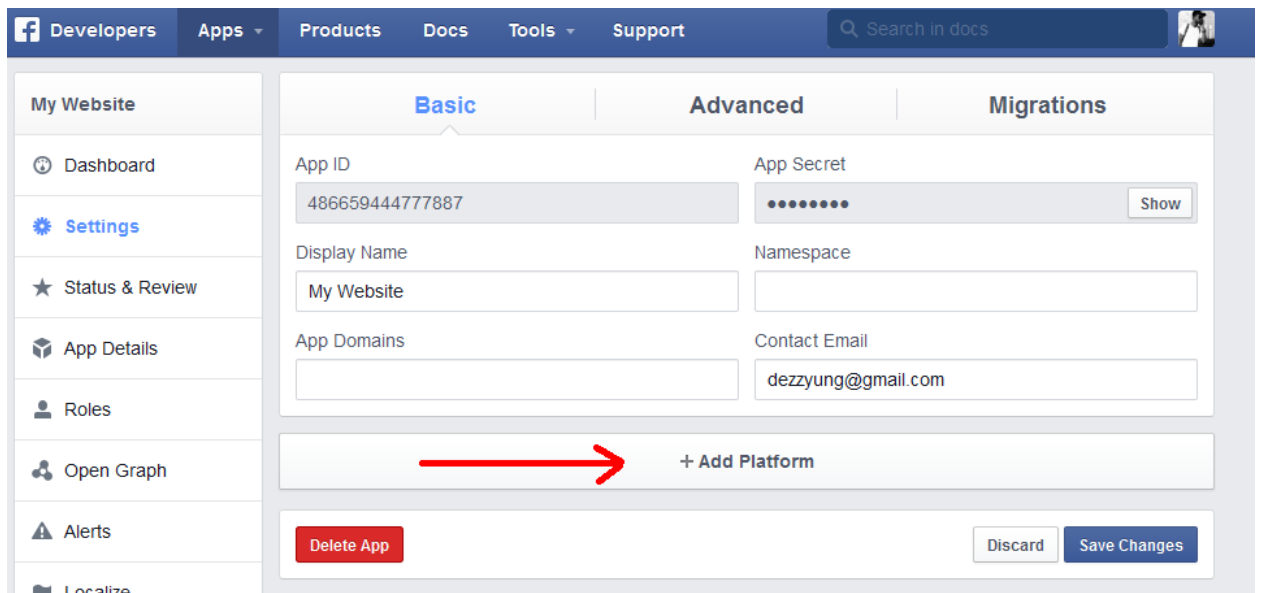

A screenshot of the 'Create a New App' form with a 'Security Check' modal overlay. The modal has a blue header 'Security Check' and displays a distorted image of the text 'XFKUB3'. Below the image, it asks 'Can't read the text above?' and 'Try another text or an audio captcha'. There is a text input field labeled 'Text in the box:' and a 'What's this?' link. At the bottom of the modal are 'Submit' and 'Cancel' buttons. The background form is partially visible, showing the same fields as the previous screenshot.

4) Go to Settings

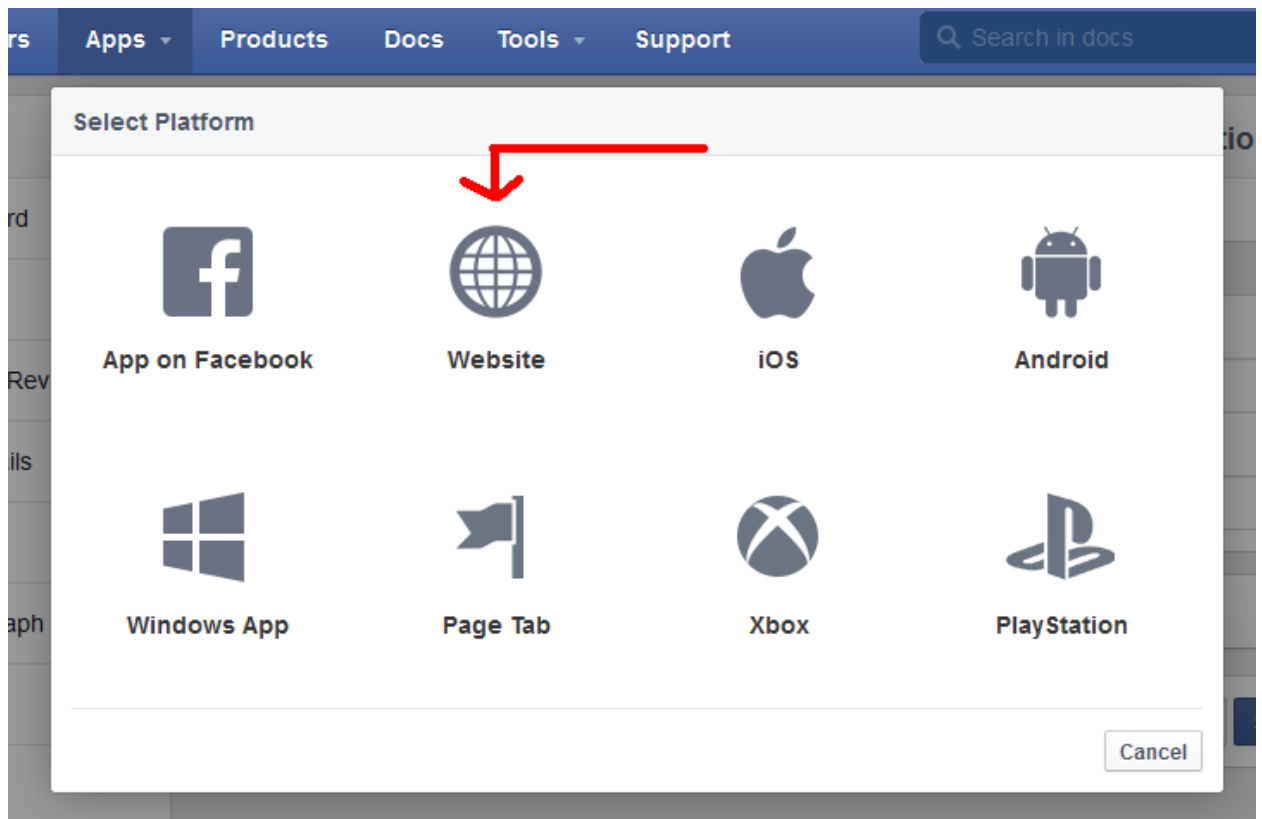

The screenshot shows the Facebook Developers interface for an application named 'My Website'. The left sidebar contains a menu with the following items: 'My Website', 'Dashboard', 'Settings' (highlighted with a red arrow), 'Status & Review', 'App Details', 'Roles', 'Open Graph', 'Alerts', 'Localize', and 'Payments'. The main content area is titled 'Dashboard' and displays the application's logo, name, and status ('This app is in development mode !?'). It also shows the 'App ID' (486659444777887) and 'App Secret' (masked with dots). Below this, there is a 'User Stats' section with a line graph showing 'Active Users' over time, with a legend for 'Monthly Active Users', 'Weekly Active Users', and 'Daily Active Users'.

5) Click Add Platform

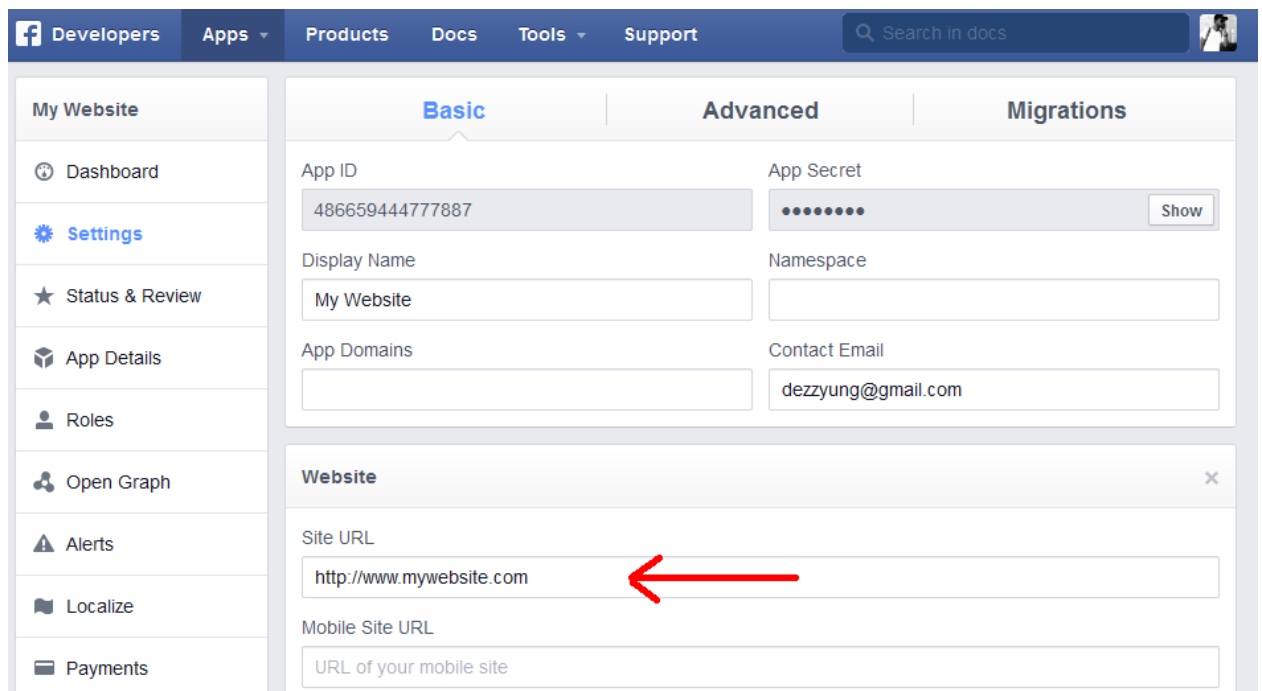

The screenshot shows the Facebook Developers interface for the 'My Website' application, specifically the 'Settings' page. The left sidebar is the same as in the previous screenshot, but the 'Settings' link is now highlighted. The main content area is divided into three tabs: 'Basic', 'Advanced', and 'Migrations'. The 'Basic' tab is active and shows fields for 'App ID' (486659444777887), 'App Secret' (masked), 'Display Name' (My Website), 'Namespace', 'App Domains', and 'Contact Email' (dezzyung@gmail.com). At the bottom of the 'Basic' tab, there is a red button labeled '+ Add Platform' (highlighted with a red arrow), a 'Delete App' button, and 'Discard' and 'Save Changes' buttons.

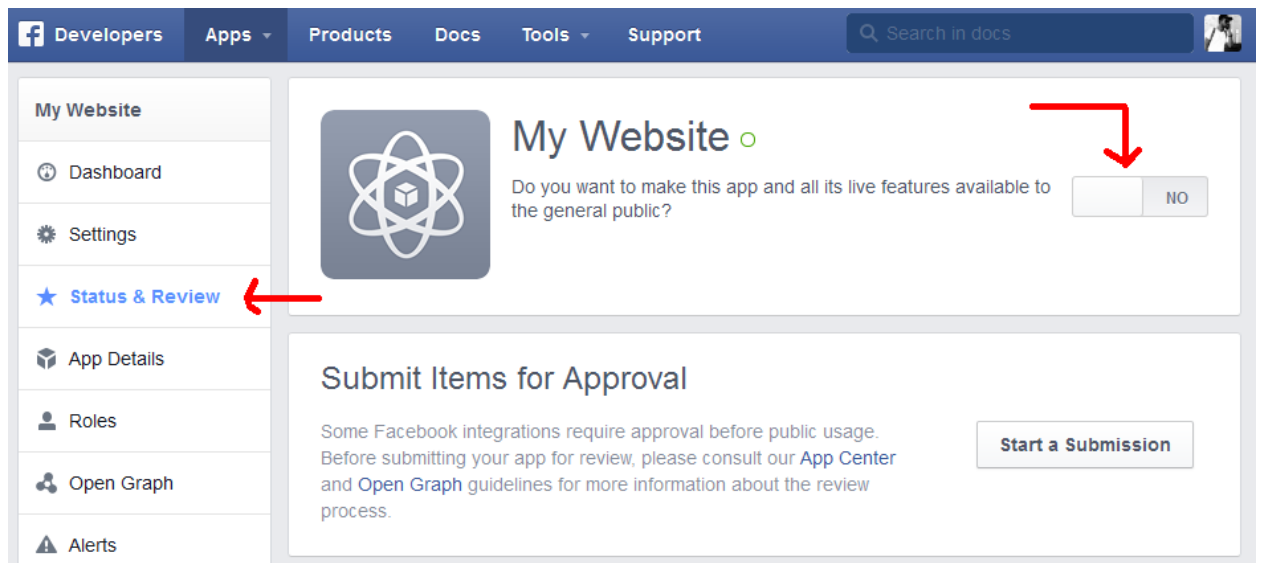

6) Select Platform: **Website**

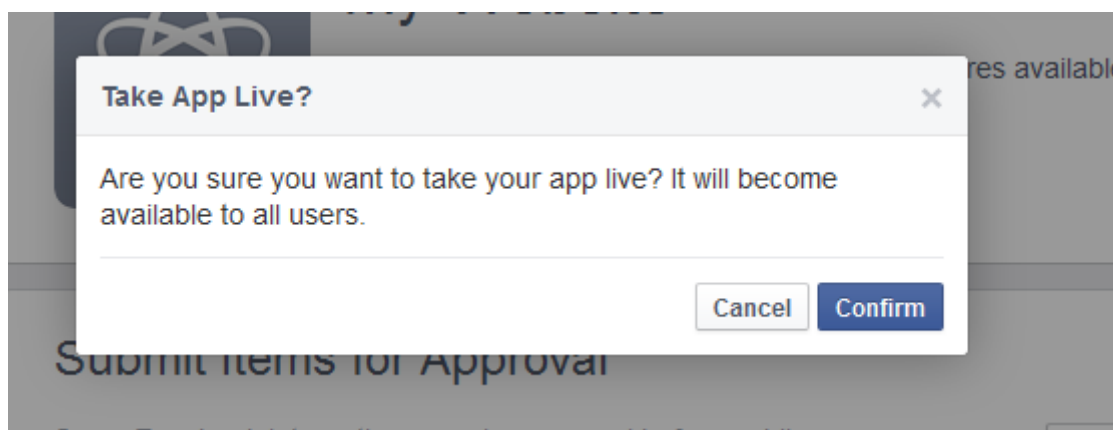

7) Enter **Site URL**

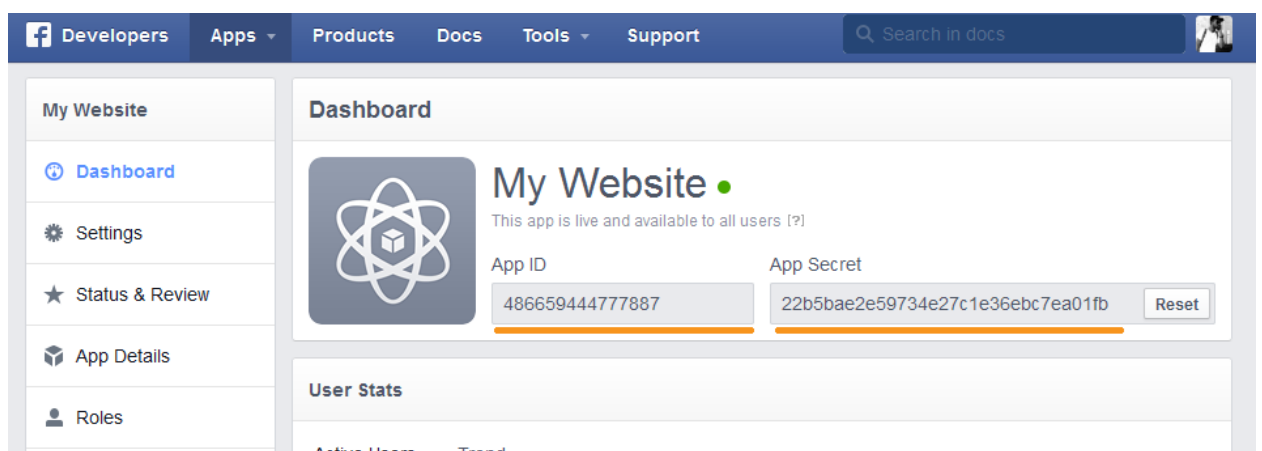

8) Go to Tab **Status & Review**. Make App is **LIVE**

9) Click Confirm

10) **Now your APP is LIVE**. Use your **App ID** and **App Secret**

Deactivation:

1. Uninstall module.

Log into Prestashop Admin Panel and go to Back Office > Modules > Other Modules and uninstall **Facebook Connect, Fan Coupon, Coupon for registration** module.

2. Clear cache.

Prestashop 1.6.x.x

Log into Prestashop Admin Panel and go to Back Office > Advanced Parameters >Performance and set Template compilation: Force compilation.

Prestashop 1.5.x.x

Log into Prestashop Admin Panel and go to Back Office > Advanced Parameters >Performance and set Template Cache: Force compile and set Cache: Disable

Prestashop 1.4.x.x

Log into Prestashop Admin Panel and go to Back Office > Preferences >Performance and enable the Force compile. (Forse compile - this forces Smarty to (re)compile templates on every invocation. This is handy for development and debugging. It should never be used in a production environment.)

Prestashop 1.3.x.x

To clear cache /tools/smarty/cache/ and /tools/smarty/compile/ delete files in these folders.

Disclaimer!

It is highly recommended to backup your server files and database before installing this module.

No responsibility can be taken for any adverse effects installation or advice may cause.

Recommended you install on a test server initially to carry out your own testing.
